

## **Social Media Policy**

The setting provides no opportunity for communication with parents through social networking media.

Staff are strictly forbidden from discussing any aspect of their work, the children in their care or other staff through social network media.

Staff are strictly forbidden to use social network media to publish any photos taken during their employment within the setting; whether it contains images of children or staff.

Staff members should avoid communication with parents through social networking media. However where such communication does exist (due to friendships outside of the setting) there should be no discussion about anything which relates to the work setting.

Staff may include images of other staff, taken outside of the work setting, where the express permission of the staff member concerned has been sought and given.
